

Sortimo®

New transparency and ease of use

The [T-BOXX](#) – practical, robust, light-weight

Once again Sortimo is revolutionising the trades with our new case.

The transparent lid lets you see right away what is in the case. The inset boxes are securely locked into position on the bottom of the case and the lid. This means that not all of the boxes need to be in the case all of the time.

The new [T-BOXX](#) from Sortimo guarantees perfect handling with its ergonomically shaped handle for

comfortable use. The two snap locks are easy to operate and lock securely. The transparent case is extremely sturdy and is an excellent partner for your tough assignments.

The new [T-BOXX](#) would not be made by Sortimo if it didn't fit perfectly into the Sortimo [Globelyst](#) in-vehicle equipment system.
